

Listening to audiobooks in your car

Because of the copy protection it is not possible to copy the audio-files of the Onleihe on a USB stick for example and listen to the audiobook in your car.

[Export in PDF](#)

The streaming or download of Onleihe audiobooks is only possible with the Onleihe app.

However we received some hints from Onleihe users on how you are able to listen to audiobooks in your car:

- If your car radio is Bluetooth enabled, you can connect your smartphone to your car radio via Bluetooth.
- If your car radio is not Bluetooth enabled, you can connect your smartphone via FM or Bluetooth-FM-transmitters. The transmitter sends an audio signal to an available radio station.
- If your car radio has a 3,5mm cable connection, you can connect your smartphone via a 3,5mm audio cable.
