

# Intel Atom x86 architecture

[Export in PDF](#)

Android devices with x86 based processors like Intel Atom are not compatible with the Onleihe app. The Onleihe app is not available for these in the Google Play Store.

Devices such as the Toblino Tab 8, various tablets from Lenovo and the Samsung Galaxy Tab 3 10.1 from 2013 are affected.

Almost all modern smartphones and tablets use ARM processors.

The x86 technology is not outdated but very uncommon in combination with mobile devices.

There will be no solution of the divibib for this issue.
