[Export in PDF](#)

The eReader Onleihe is a version of your Onleihe that has been specially adapted to eReader and makes it easy to browse, borrow and discover media with your eReader.

Important:

- All eReaders listed below in principle are compatible with the eReader Onleihe. This compilation is based on the data given by the manufacturer.
- The eReaders compatible with the Onleihe are not designed for the use of eAudios, even if the device has an audio player.

These eReaders are neither a purchase recommendation nor a guarantee that a device will perform all the desired functions. This also applies to the necessary DRM functionality. We therefore strongly recommend clarifying the requirements with the dealer before purchasing a device.

The current software version for the Tolino eReader can be downloaded manually from the official support page if required: <https://mytolino.de/software-updates/>

--------------------------	---	---

* **From software version 6.3 onwards, the PocketBook eReaders also offer CARE-DRM support.**

As soon as PocketBook's own shop www.pocketbook.de is pre-installed on the device, an Onleihe app can be found on the device under "Apps". In the case of devices with a bookseller shop, the Onleihe app is deactivated for contractual reasons.

A PockeBook device can be connected to the PocketBook's own shop www.pocketbook.de via [PockeBook Support](#).
